

CASE STUDY

JP4 SERIES AVOIP AT THE DANSKE BANK HEADQUARTERS

Customer: Danske Bank

Installation Location: Copenhagen, Denmark

Integrator: AVCenter

Netvio Distributor: Unit.DK

PROJECT OVERVIEW

Danske Bank's new headquarters required a cutting-edge AV distribution system that could seamlessly integrate high-security requirements with exceptional image quality and cost-effective deployment.

To meet these demands, Netvio's advanced AVOIP solutions were selected, ensuring high-performance video distribution across the building.

NETVIO PRODUCTS UTILIZED

- JP4-60 Series AVoIP Encoders & Decoders: 6 encoders to 5 decoders
- JP4 Series AVoIP Encoders & Decoders: 2 encoders to 64 decoders

INFRASTRUCTURE & CONTROL INTEGRATION

- Network Hardware: Cisco C1000 Catalyst & Netgear AV-Line Switches
- Control System: Crestron, utilizing the Netvio Crestron Driver for seamless automation and control

INSTALLATION HIGHLIGHTS

- **Ground Floor Display Solution**
Five large-format Samsung 'The Wall' LED displays serve as the focal point of the ground floor, driven by the Netvio JP4-60 series AVoIP system, delivering immersive visuals for corporate branding and communication.
- **Meeting Rooms & Signage**
Netvio JP4 series encoders and decoders distribute high-resolution content throughout meeting rooms and common areas, ensuring clear and dynamic digital signage across the headquarters.

KEY FEATURES & BENEFITS

1

High Security Credentials

Netvio's AVoIP solution was chosen for its industry-leading security, ensuring that the AV distribution system met Danske Bank's stringent IT and cybersecurity standards.

2

Superior Image Quality

The Netvio JP4 & JP4-60 series deliver pristine 4K video, making them ideal for high-end corporate environments.

3

Cost-Effective Deployment

With standard 1Gb PoE implementation, the system minimizes infrastructure costs by leveraging existing network hardware without requiring costly 10Gb upgrades.

CONCLUSION

The deployment of Netvio AVoIP solutions at Danske Bank's new headquarters highlights the power, flexibility, and efficiency of the JP4 and JP4-60 series.

By combining cutting-edge video distribution with seamless control integration, Netvio has helped create a high-performance AV system that meets the security, quality, and cost-efficiency demands of a modern corporate environment.
